

Speaker 1: On your first visit to Rising Integrative Healthcare, our providers are going to spend time figuring out exactly what you want and need from our office, and do some exams to really figure out the severity of your condition and make a plan customized for you to figure out what's going to get you the results that you need. Get you back to living life on your own terms again. Whether it's knee pain, neuropathy, numbness, tingling, burning in the hands or feet or shoulder pain. Whatever your condition is, they're going to figure it out and make a custom treatment plan just for you.

Now, our staff will be there to answer any questions you have along the way with treatment and make sure that you feel safe and comfortable in our environment, which most people find to be very relaxing.

Your provider will also do periodic re-exams to make sure that you're getting the results that you came to us for. We want you to be meeting those goals that you set, whether it's being able to walk further, being able to play with your grandkids, or just being able to sleep without pain. Whatever those goals are for you, we want to make sure that you're reaching those goals.

Now, I want to let you listen to Kevin's story and he's going to actually tell you about how he's been doing. And he's only been doing treatment for about a week and a half when we took this video and he's doing phenomenally already. Let's listen in.

Kevin: You know, I walk further than what I've ever walked around. Yesterday, when I left here, I went to bridge and went home and then I went and mowed two and a half acres of land.

Speaker 3: Wow, that's fantastic.

Kevin: I got off the lawnmower. I felt just as good as gold. You know, like I said, my hands are more flexible. You know, before I couldn't drive from here to home without my thumb and my fingers cramping on the steering wheel. Now I don't have a problem.

To me, what's happened in the last week and a half has been mind changing about getting around.

Speaker 1: Our front desk will find convenient times for you to come in and get the treatment you need that's going to keep you on the path to getting back to living life on your own terms again.

We look forward to seeing you in the office and helping you achieve your healthcare goals.
